

# Centered on you

**Connected Care California is a model of care centered on you, with an emphasis on preventive and personalized care.**

## Personalized, Quality and Coordinated Care

### Stanford Medicine Excellence

With stellar reputation, rigorous patient safety standards, and ground-breaking research, Stanford Health Care was selected as a partner for Connected Care California.

### Your Health Care Partner

Choose a personal doctor to serve as your primary care physician (PCP). From annual physicals to serious health challenges, your PCP will get to know you, your health goals and medical history.

### Support from Care Management

If you have a new diagnosis or a chronic condition, our nurse care managers are here to provide additional support. They will partner with you and your care team to coordinate services and help you navigate and understand your care. [Learn more »](#)

## A Broad Network and Many Ways to Access Care

- 700+ primary care doctors and pediatricians
- 2,700+ specialists from Stanford Medicine and affiliated network
- 3 Stanford hospitals and select community hospitals
- In-person and video visits, Express Care Clinics, Walk-in Clinic, and adult/pediatric urgent care

## Connected Care Concierge Center

You have a great resource available with the Connected Care Concierge Center team. They are available to answer your questions about the plan, including benefits and member cost share, and can assist in finding a doctor that's right for you.
