Stanford Health Care, Santa Clara: Reinventing Your Healthcare Experience

Stanford Health Care, Santa Clara offers an enhanced primary care experience for families and individuals of all ages, birth through the senior years. Your health is our priority. Our dedicated team of providers and support staff is focused on getting you healthy and keeping you there. Our building has been custom designed to be comfortable, efficient, and respectful of your privacy and convenience.

Services we offer

Patients and families benefit from our team-based care. Our practice is built on the premise that you, the patient, should be at the center of all we do. Our models and workflows are built on this principle, allowing providers to devote more time to each patient. From prenatal care and women's health to pediatrics, primary care to geriatrics, we can care for every member of your family, throughout the entire lifespan.

Specialty care

We offer specialty care and support services here in our building. These include cardiology, dermatology, digestive health, gynecology, nephrology, pain management, physical therapy, and positive care. If other specialists are needed, our providers coordinate care with them

as well. And they provide direct access to the resources and specialists for which Stanford Health Care is so well known.

What makes us different

- Comprehensive first visits, as long as 80 minutes, with a focus on getting to know you
- Team-based care, including a designated care coordinator focused on helping you meet your health goals
- Care navigation, with a care coordinator by your side throughout every visit, to take notes and answer questions
- Video visits and electronic communication options allow for more convenient care

We respect your time, your priorities and our relationship with you!

We are accepting new patients for this innovative primary care practice now. Call today to learn more and make an appointment: 408.688.9720
